Installation Instructions

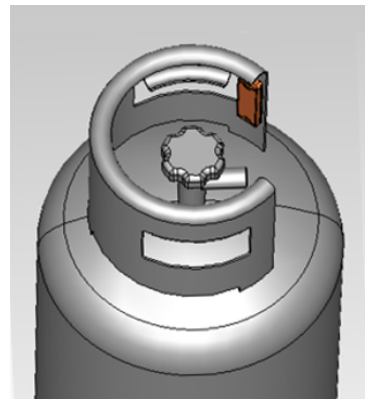

Use M3 rivets for RTI attachment:

1. Drill two holes (\varnothing 3.50) in the metal surface, pitch: 61.70 mm.
2. Utilize M3 rivets in conjunction with a rivet gun to securely fasten the tag onto the metal surface.

Use glue/epoxy for LPG and gas cylinders attachment:

1. Select the suitable attachment location on the gas cylinder (usually inside the protection ring).
2. Clean the surface for rugged attachment.
3. Apply glue/epoxy resin evenly on the back of the RTI tag.
4. Place the tag vertically and tightly against the gas cylinder shroud mounting location.
5. Use tape to hold the tag ends in place until the glue/epoxy cures..
6. Remove the tape after 24 hours (the time depends on the glue/epoxy used)

¹Tolerance: +/- 0.02; +/- 0.50
